## **DETAILED ACTION**

1. Applicant's amendment, filed 12/1/05, has been entered. Claims 1-52 have been canceled.

Claims 53-56 are pending.

2. Applicant's Status Inquiry, filed 3/30/06, is acknowledged.

This Office Action should serve in response to applicant's After Final Amendment and Status Inquiry.

The examiner apologizes for any inconvenience to applicant in this matter.

## **REASONS FOR ALLOWANCE**

3. The following is an Examiner's Statement of Reasons for Allowance:

As indicated in the previously, the instant claims appear to be free of the prior art. It does not appear that the prior art teaches or suggests the particular isolated nucleic acids claimed. Accordingly, the instant claims appear to be allowable.

4. The non-statutory double patenting rejection, whether of the obvious-type or non-obvious-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. *In re Thorington,* 418 F.2d 528, 163 USPQ 644 (CCPA 1969); *In re Vogel,* 422 F.2d 438, 164 USPQ 619 (CCPA 1970); *In re Van Ornam,* 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Longi,* 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and *In re Goodman,* 29 USPQ2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321 (b) and (c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78 (d).

Effective January 1, 1994, a registered attorney or agent of record may sign a Terminal Disclaimer. A Terminal Disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 53-56 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 50 of copending application USSN 10/627,723. Although the conflicting claims are not identical, they are not patentably distinct from each other because each composition is drawn to the same or nearly the same nucleic acids encoding a T cell inducible factor comprising SEQ ID NO: 24. Therefore, the instant or copending claims appear to either anticipate or render obvious one another.

This is a *provisional* obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 1644

Given that a provisional double patenting rejection over copending USSN 10/627,723 would be the only rejection remaining in this application; such a provisional obvious double patenting is withdrawn to permit this application to issue. See MPEP 804.
